

Product Details

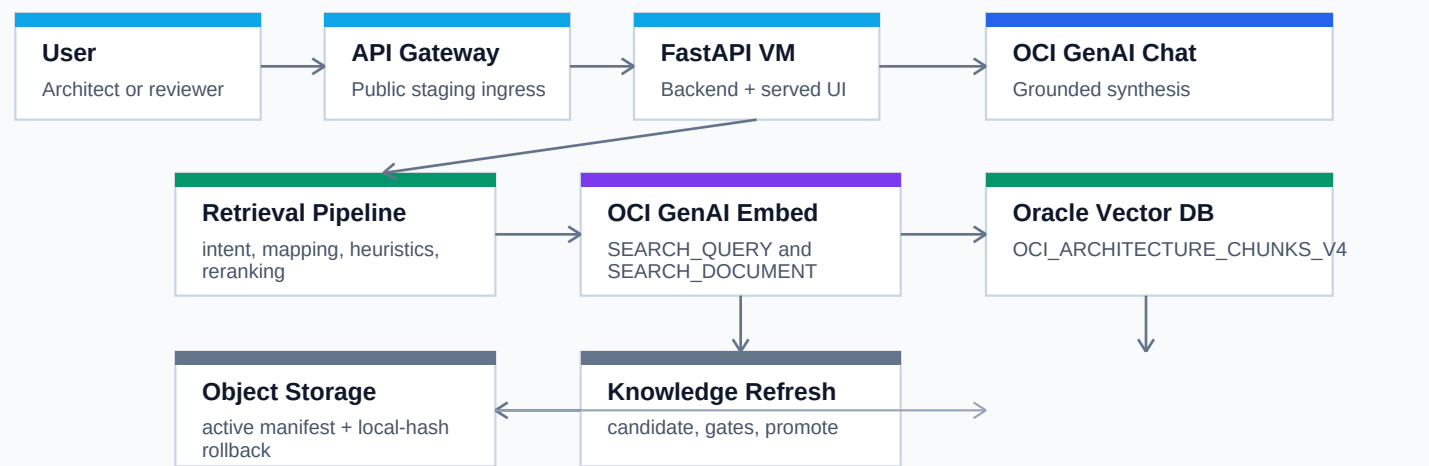

OCI architecture advisory with live GenAI synthesis, semantic retrieval, citations, and rollback-safe operations.

What it does

Transforms OCI architecture, migration, resilience, security, observability, cost, and release-awareness questions into grounded recommendations with citations, confidence, risks, topology, governance, and next steps.

Synthesis OCI GenAI chat xai.grok-4.3	Retrieval Oracle AI Vector Search active V4 table	Embeddings Cohere embed v4 1536 dimensions	Validation 32/32 retrieval 18/18 golden, 8/8 edge
---	--	---	--

Current architecture

Current live facts

Active corpus	60 curated chunks, 52 services, 15 service domains
Guardrail	Runtime provider/model/dimensions must match index metadata
Rollback	256-dimension local-hash table and Object Storage manifest retained
Open gap	team-real-prompts eval file still needs to be restored or created

Why it matters

- Reviewable, evidence-linked starting point instead of a generic chatbot answer.
- Provider changes stay reversible through Object Storage, Oracle Vector, and local JSON rollback paths.
- Eval gates and health endpoints make quality, grounding, and runtime state visible.
